

Marine Approved, High Quality, Rugged Metal Construction Display

KME have developed a high resolution TFT panel which is designed to withstand the maritime environment. The displays are IP sealed to withstand shock and vibration and are designed to comply with marine approved standards. The LRD range is a lower cost solution for the standard rack mount monitor, which uses multiple sheets of metal bonded together.

Designed with ECDIS and Radar in mind, the range specifically meets the stringent demands of Shock, Vibration, EMC and EMI defined in the IEC 60945 International Standard for Maritime Navigation and Radio communications Equipment & Systems.

To aid installation, flexible mounting combinations include 100mm VESA standard fixings at the rear, and a separate mounting bracket for Control Desk or Overhead positioning.

The use of high quality components, robust and lightweight casing, anti - glare safety glass, transfective enhancements and touchscreen capability makes KME's monitors ideal for demanding applications.

Features

- The LCD monitor has been designed with solidity, being housed in a compact metal construction with a toughened glass protection screen
- A resistive touch screen has been integrated into the monitor to control the internal PC
- The PC has a 1.5GHZ intel pentium processor with 1GB ram and 32GB compact flash or SATA drive
- The front panel is sealed to IP65 rating. There is also a RS232 control for brightness
- KME have developed a deep dimming solution for the marine range which provides smooth consistent dimming to 2000:1

15" LCD Marine Rackmount PC Based Monitor 29LRD153AR35PC/1
